

SECA 813 DIGITAL ELECTRONIC FLOOR SCALE

With its wide, low platform and non-slip dimpled mat, the **seca 813** is easy and safe to mount also for older patients or people with disabilities. Due to its high capacity and stable integrated steel frame it is also ideal for weighing very heavy patients. The practical step-off function means that the scales do not have to be switched on separately before use. The result is also extremely precise due to the automatic zero adjustment which takes into account any changes in the environment when changing location (for example the temperature or flooring).

The **seca 813** is well-suited to GP's, clinics, rest homes and private individuals.

Especially wide, low platform for easy mounting

The **seca 813** combines safety and comfort: the scale can be mounted comfortably and safely due to the extremely low platform (48 mm high) and the non-slip as well as soft dimpled mat. The platform is extremely hard-wearing, durable and easy to clean.

High capacity and stability

A scale that stands firm: it only weighs 2.6 kg, but can support 200 kg. The **seca 813** has an extra wide platform (432 mm) which is highly stable due to the integrated steel frame.

Quick, reliable weighing with step-off function

The step-off function is not only practical because the scale does not have to be switched on before weighing. It also ensures that the measuring result is especially accurate as the scale automatically adjusts to zero at every weighing. As it weighs very little, the **seca 813** is also suitable for mobile use.

Easy to read LCD figures

To ensure that the measuring result can be recorded quickly and correctly, the **seca 813** is equipped with an easy-to-read, 29 mm high LCD display.

DESCRIPTION
SCALES SECA DIGITAL ELECTRONIC 200KG/100G

SECA 813 DIGITAL ELECTRONIC FLOOR SCALE

Features include:

- **Easy to read display** - modern design with high contrast 25mm LCD digits for easy reading.
- **High accuracy** - the all solid state electronic measuring system uses multiple load cells and is accurate across the full measuring range up to 200 kg / 440 pounds. The digital display shows weight in increments of 100 g / 0.2 pound.
- **Dual mode** - the scale switches between pound and kilogram mode using a switch on the scale.
- **Large weighing platform** - comfortable and stylish, the extra wide 432 mm (17") wide x 271 mm (14.6") deep platform is low profile and has a textured rubber mat to accommodate your feet securely.
- **Low power** - step on, auto off features all run for thousands of weighings from 4 x AA batteries (included).
- **Warranty** - two year limited warranty

Technical Specifications

Manufacturer:	Seca
Model:	813
Format:	Digital electronic floor scale with integral display
Mechanism Type:	Digital load cells (4)
Measurement Units:	Kilograms / Pounds (switch selectable)
Capacity:	200 kg / 440 lbs
Display Type:	4 digit LCD digital display with 25 mm high digits
Display Resolution:	100g / 0.2 lb
Battery Power:	Yes - 4 x AA battery (included)
A/C Power:	No
Weight:	2.6 kg
Platform Size:	432 mm (17") wide x 271 mm (14.6") deep
Platform Type:	Dimpled non-slip mat on high impact plastic
Platform Height (step up):	48 mm (1.9")
Manufacturer's Warranty:	2 years

Stable solution for good health and well-being

When you take a look at your health, your weight plays a central role. Excess weight involves the risk of suffering serious metabolic disorders such as high blood pressure and diabetes. Even a slight reduction in weight can help to reduce these risks significantly. The ideal field of application for the highly precise floor scale seca 813 is weight control in the medical sector. For the health-conscious person, it is also the ideal solution for your home: it combines comfort, stability and safety.
