FAMOS F108TX HEAT SEALER

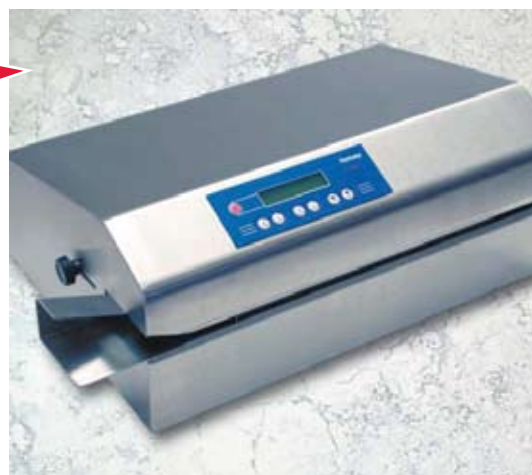

An entry level model which is simple, hard wearing, reliable and easy to operate. Ideally suited to medical clinics, dental surgeries, podiatrists and other situations where the daily packaging requirements are under 500 units.

The F108 is a basic rotary heat sealer with variable temperature adjustment, pre set self adjusting pressure and feeder speed. Other features include seal edge adjustment, microprocessor controlled operation and 15mm seal width.

Incorporates an automatic insert feed mechanism and reverse transport. The automatic insert feed starts the transportation mechanism when packaging material is fed into the machine. A manual reverse transport trigger assists in the aborting of a sealing run. With production counter and alarm.
