

FAMOS F70-300 IMPULSE HEAT SEALER

The F70 is a very reliable machine which is easy to operate and needs almost no maintenance.

The F70 is also very suitable for sealing packaging made of paper, polypropylene and tyvek and other materials which have to be sealed at low temperatures. It is also ideal for processing laminate from the roll. For this purpose the F70 has a built in roll holder for packaging materials and a cutting device for separating the sealed packaging from the roll.

This model is time-controlled and has an effective seal length of 320mm and a seal width of 8mm.

- Completely made of stainless steel
- Equipped with cutting device
- suitable to seal almost every kind of packaging
- Electronically controlled
